CONNECTING YOUR WINE COOLER

Step three depends on your display type. Everything else is the same on every connected model.

[Noble](#)[Prime](#)[Spirit](#)[Horizon](#)[Flow](#)[Grande](#)[Sera](#)[Balance](#)[Joy](#)[Home](#)[Other](#)[← HOME](#)[A-Z](#)

1 Install the app

Download Smart Life from the App Store or Google Play, or scan the QR code in your user manual.

2 Create an account

Connect your phone to your home WiFi. The network must be 2.4 GHz — 5 GHz is not supported.

3 Start pairing — TFT models

On the home screen of the display, tap the WiFi icon, then tap Connect.

3 Start pairing — LCD models

Press and hold the function button for three seconds, until four beeps. The button backlight lights up.

4 Add the device

In the app, tap the plus icon and choose Add Device. The app searches automatically.

5 Enter the password

Keep Bluetooth on and stand near the appliance while pairing completes.

6 Done

The app opens the wine cooler control panel. On LCD models the button backlight switches off.

! If it fails

TFT: tap Reconnect. LCD: check the network and repeat the press-and-hold from step three.

BEFORE YOU START

2.4 GHz network only

The appliance does not support 5 GHz. If your router broadcasts both bands under one name and pairing fails, separate them temporarily.

Bluetooth switched on

Discovery runs over Bluetooth LE, so keep Bluetooth enabled on your phone and stay near the appliance while pairing.

Signal reach

A built-in appliance sits behind furniture panels. In larger homes a mesh node near the kitchen solves an intermittent connection.

STILL NOT CONNECTING?

Contact our support team with your model number, or read the full guide with troubleshooting at dunavox.com/wifi-smart-app-wine-cooler
